

BOYANG WANG

Colchester, Essex, UK | boyang.wang@essex.ac.uk | 07784654710 | <https://www.linkedin.com/in/-bw21582-wangb39108/> | <https://boyangacct.github.io/>

PROFESSIONAL SUMMARY

Business-oriented data analyst with a strong foundation in financial reporting analytics and AI-driven insight generation. Experienced in transforming complex, large-scale text and financial data into structured analytical outputs that support decision-making, comparative reporting analysis, and performance monitoring. Proficient in Python, R, Power BI, and financial data analytics; First Class Honours in Accounting & Finance. Fluent in English and Mandarin. Seeking internship opportunities in data analytics, business intelligence, or financial reporting analysis.

KEY SKILLS

Financial Reporting & Accounting Analytics Financial statement analysis, management accounting, variance analysis, budgeting, financial reporting interpretation, cross-firm financial benchmarking, disclosure quality assessment

Data Analytics & Econometrics Regression analysis, panel data modelling, statistical inference, predictive modelling, financial forecasting, data cleaning and transformation, quantitative trend analysis

Risk & Reporting Intelligence Corporate disclosure analysis, reporting consistency evaluation, ESG disclosure analysis, text-based risk signal extraction, financial communication quality assessment

Programming & Data Tools Python (pandas, NumPy, scikit-learn, NLTK, transformers), R, Stata, SQL (basic), Excel, Power BI

NLP & Machine Learning for Financial Text Text classification, sentiment analysis, transformer-based embeddings, document similarity analysis, NLP pipelines, LLM-assisted financial document processing, automated text analytics workflows

Communication & Stakeholder Engagement Presentation of analytical insights to academic and non-technical audiences, structured financial reporting analysis, report writing for data-driven decision-making, cross-functional collaboration, cross-cultural communication (English & Mandarin)

EXPERIENCE

Doctoral Researcher

Sep 2024 – Present

Essex Business School, University of Essex, Colchester, UK

- Built automated Python workflows to ingest, clean, and process 10,000+ corporate annual reports from EDGAR/SEC and CSMAR databases, improving data collection scalability and freeing up capacity for higher-value analytical work.
- Developed scalable text analytics workflows using sentiment analysis and text classification to evaluate reporting quality and communication patterns across 1,000+ listed firms, enabling systematic cross-company performance analysis.
- Conducted large-scale statistical and panel data analysis in R and Stata to identify reporting trends, monitor disclosure behaviour changes, and support comparative financial reporting evaluation across firms and sectors.
- Generated structured analytical reports and visual outputs to support comparative reporting analysis and decision-oriented insight generation, enabling business-focused evaluation across firm and sector cohorts.
- Presented quantitative findings at institutional conferences, translating complex analytical outputs into clear, business-relevant insights for non-technical and cross-functional audiences.

Accounting Intern

Jul 2021 – Sep 2021

Dingcheng Co., Ltd., Lu'an, Anhui, China

- Processed day-to-day bookkeeping and journal entries using Kingdee ERP software, recording accounts payable/receivable transactions and reconciling monthly bank statements with ledger balances.
- Assisted in preparing monthly management reports and cost summaries, supporting senior accountants in budget tracking and variance analysis; collaborated closely with colleagues across finance and operations teams to ensure accurate data consolidation.

LEADERSHIP & EXTRACURRICULAR

Deputy Director, Office of Academic Affairs — Student Union

2019 – 2021

Guangdong University of Foreign Studies, Guangzhou, China

- Coordinated and delivered a programme of guest lectures and research workshops, managing logistics and stakeholder communication across academic departments.
- Gained practical experience in project planning, team coordination, and institutional communication in a fast-paced student governance setting.

PROJECTS

Corporate Disclosure Analytics Dashboard

Python | NLP | Financial Reporting Analytics

- Designed an end-to-end text analytics solution to automate the ingestion, processing, and comparative analysis of large-scale corporate reporting datasets, enabling scalable disclosure monitoring and trend identification.
- Built automated scoring and reporting workflows using text classification and sentiment analysis to support disclosure quality comparison across firms and sectors, improving analytical efficiency and reducing repetitive manual processing.
- Developed structured reporting dashboards and analytical outputs to support operational monitoring of disclosure trends and communication patterns, providing actionable business intelligence across firm cohorts.
- Integrated data cleaning, workflow automation, and reporting visualisation to deliver a fully automated analytics pipeline, significantly reducing manual effort and improving turnaround for large-scale reporting analysis.
-

Large-Scale Financial Text Analytics — Chinese A-Listed Firms

Python | Stata | Financial Text Analytics

- Conducted automated analysis of annual reports across 1,000+ Chinese listed firms using Python and Stata to evaluate readability, tone, forward-looking disclosure, and boilerplate patterns, supporting comparative performance analysis and reporting quality assessment.
- Built structured datasets and analytical outputs to support large-scale statistical modelling, enabling systematic trend identification and cross-sector reporting behaviour monitoring.
- Produced comparative analytics reports to identify sector-level disclosure patterns and reporting behaviour differences, generating business-relevant insights to support financial reporting evaluation and decision-making.

EDUCATION

Doctor of Philosophy (PhD) — Accounting

2024 – 2029 (in progress)

Essex Business School, University of Essex, Colchester, UK

- Research focus: AI and machine learning applications in financial data analytics and corporate reporting quality.

BSc Accounting and Finance — First Class Honours

2021 – 2023

University of Essex, Colchester, UK

- Core modules: Financial Reporting, Management Accounting, Corporate Finance, Auditing.
- Quantitative modules: Calculus, Linear Algebra, Probability & Mathematical Statistics.
- Dean's List 2022.

Diploma — Accounting and Finance (GPA: 3.8 / 4.0)

2019 – 2021

Guangdong University of Foreign Studies, Guangzhou, China

- Awards: Freshman Scholarship (2019), Academic Excellence Award, Outstanding Student Award.

PRESENTATIONS & CONFERENCES

Essex Business School PhD Annual Conference

Jun 2026

PhD Sustainability Workshop — Essex Business School

May 2026
