

Boyang Wang

PhD Candidate in Accounting · University of Essex

📍 Colchester, Essex, UK ✉ bw21582@essex.ac.uk ☎ 07784 654710 🔗 [linkedin.com/in/-bw21582-wangb39108](https://www.linkedin.com/in/-bw21582-wangb39108)

Personal Profile

PhD Candidate in Accounting (Essex Business School, University of Essex) with a First Class Honours BSc in Accounting and Finance. Possesses a strong grounding in financial accounting, financial reporting, and quantitative analysis, complemented by advanced research training in AI and machine learning applied to accounting. Has supported undergraduate teaching in accounting subjects and is committed to delivering clear, engaging, student-centred instruction in line with active learning principles.

Education

Doctor of Philosophy (PhD) — Accounting

2024 – 2029 (in progress)

Essex Business School, University of Essex, Colchester, UK

- Research focus: Application of Artificial Intelligence and Machine Learning in accounting and finance
- Key themes: algorithmic accommodation in corporate disclosure, AI-driven changes in financial reporting, and NLP-based textual analysis of annual reports
- Advanced methods training: stochastic processes, statistical inference, measure theory (real analysis), Difference-in-Differences causal inference

BSc Accounting and Finance — First Class Honours

2021 – 2023

University of Essex, Colchester, UK

- Core modules: Financial Reporting, Management Accounting, Corporate Finance, Auditing
- Quantitative training: Calculus, Linear Algebra, Probability & Mathematical Statistics, Mathematical Analysis
- Graduated with First Class Honours

Diploma — Accounting and Finance (GPA: 3.8 / 4.0)

2019 – 2021

Guangdong University of Foreign Studies, Guangzhou, China

- Deputy Director, Office of Academic Affairs, Student Union: organised guest lectures, research workshops, and student-faculty discussion panels
- Developed strong organisational and cross-cultural communication skills

Working Papers

[WP1] *Writing for Machines: Algorithmic Accommodation in Corporate Disclosure*

In preparation

This paper investigates whether corporate managers strategically adapt disclosure language to influence algorithmic readers, particularly Large Language Models (LLMs) such as ChatGPT and DeepSeek. I introduce the concept of Algorithmic Disclosure Management and construct a novel LLM-Targeting Score that aggregates three measurable dimensions: structural prompt-like features, sentiment optimisation features, and embedding alignment with LLM-preferred prototypes.

[WP2] *The Impact of Artificial Intelligence on Corporate Annual Report Disclosure: Evidence from Chinese A-Listed Firms*

Under preparation for submission, 2026

This paper examines how the widespread adoption of AI has transformed the textual characteristics of annual reports produced by Chinese listed companies. Using large-scale textual analysis of corporate disclosures, the study investigates structural shifts across four key dimensions: readability (linguistic complexity and accessibility), similarity (cross-firm boilerplate homogeneity), forward-looking content (frequency and nature of prospective statements), and tone (sentiment and managerial optimism). Findings contribute to the growing literature on AI-driven changes in corporate communication and financial disclosure quality within an emerging-market context.

Teaching Experience

- Provided in-class teaching support for undergraduate modules including *Fundamentals of Management Accounting*, *Statics*, assisting the course instructor with worked examples and problem-solving exercises
- Led structured revision sessions ahead of end-of-semester examinations, consolidating students' understanding of core accounting concepts such as cost behaviour, budgeting, and variance analysis
- Developed ability to explain technical material clearly and responsively, adapting explanations to varying levels of student understanding

Relevant Skills & Expertise

Financial Accounting & Reporting

Solid foundation in the preparation, analysis, and interpretation of financial statements (income statement, balance sheet, cash flow statement). Familiar with accounting standards and regulatory frameworks relevant to undergraduate financial accounting curricula.

Teaching & Communication

Experienced in supporting undergraduate accounting instruction through problem-solving demonstrations and examination revision. Comfortable with active learning and interactive seminar delivery, aligning with the IY404 module's pedagogical approach.

Quantitative & Analytical Skills

Proficient in Difference-in-Differences and panel data econometrics; experienced in large-scale textual analysis using NLP methods. Strong mathematical background supporting rigorous engagement with accounting theory and causal inference methodology.

Technical Tools

- Software: Python (NLTK, HuggingFace Transformers, pandas), R (fixest, lfe), Microsoft Office Suite, L^AT_EX
- LLMs & NLP: LLaMA-3, DeepSeek R1, Mistral 7B, OpenAI API; embedding similarity, sentiment analysis
- Data: EDGAR/SEC filings, Compustat, CRSP, I/B/E/S, CSMAR (Chinese financial data)
- Platforms: Canvas/Moodle (learning management systems), Overleaf

Languages

- English: Fluent (academic and professional)
- Mandarin Chinese: Native
